

We, the undersigned, are concerned about climate change and ask the Municipality of Skagway to prepare and adopt a Climate Action Plan for our community. The Climate Action Plan should include a baseline study, and mitigation and adaptation strategies specific to our area. This request is in line with Skagway 2020 Comprehensive Plan which indicates that the Municipality should consider measures that address climate change.

*Economic costs of community responses to climate change are likely to increase over time, and proactive responses will minimize negative impacts.<sup>1</sup>*
