COVID-19 Risk Assessment & Management of Suspected Cases

This algorithm should not replace clinical judgement when determining the course of action for a given case.

Within the last 14 days has the person travel through and affected geographic area?

YES

Did the person have symptoms of COVID-19?

YES

Did the person have any contact with a laboratory confirmed case of COVID-19?

YES

Did the person have contact with, in the context of living with, being intimate with or caring for a person with confirmed COVID-19?

YES

Did the person contact respiratory secretions or was the person within 6 feet of a case for a prolonged period (i.e. more an in passing)?

YES

Was the person in the same indoor environment as a confirmed case for a prolonged period but did not meet the definition of close contact (i.e. same waiting room or class room)?

YES

Actions for people WITHOUT COVID-19 Symptoms

Place in quarantine. Remain under quarantine authority. No activities in Public settings

Self-Isolate. Monitoring to include vital signs with temperature twice daily (every 12 hours). No congregate activities. Mask for movement outside of isolation.

Self-Isolate. Monitoring to include vital signs with temperature twice daily (every 12 hours). Wear mask in congregate settings.

None

Actions for people WITH COVID-19 Symptoms

Immediate quarantine; medical evaluation and monitoring. Mask for all movement outside of isolation

Immediate quarantine; medical evaluation according to PUI guidelines. Mask for all movement outside.

Self-Isolate. Avoid congregate activities. Wear mask for any movement outside cell.

Routine medical care

Report all suspected cases of COVID-19 to the on-call Provider.

Examples may not cover all potential exposures to COVID-19. This algorithm should not replace clinical judgement when determining the course of action for a given case.

Unless otherwise specified, isolation or quarantine should be maintained for the duration of the incubation period (14 days).

Notes:
