

February 28, 2023

Mayor Cremata, Assembly, Manager Ryan,

The Solid Waste Advisory Committee met on Tuesday, February 28th, to discuss the following:

- SWAC's discussed Spring Clean Sweep and reviewed and recommended a poster for the event this year.
- SWAC discussed the Community Rummage Sale and got an update from the Recreation Center regarding the event in April.
- SWAC also discussed our motion we have previously recommended to retract or revise a portion of the approved draft document for residential and commercial GBtP pick-up, and (instead) recommend that a smaller and lower cost, volume-based collection amount—as part of a tiered system—be added to the Municipality's current volume-based waste collection and billing system; to encourage waste reduction through composting and recycling options.
 - We did think it was a good idea to announce this, and any other changes, at the same time as the Bear Proof Can rollout.

Respectfully,

Annemarie Hasskamp
Solid Waste Advisory Committee, Chair
