## Public Notice RE: Johnson & Johnson Janssen COVID-19 Vaccine

The CDC and FDA have recommended that use of Johnson & Johnson's Janssen (J&J/Janssen) COVID-19 Vaccine resume in the United States, effective April 23, 2021. However, women younger than 50 years old especially should be aware of the rare risk after vaccination of blood clots with low platelets, and that other COVID-19 vaccines are available where this risk has not been seen.

If you have questions about the Janssen vaccine or the other COVID-19 vaccines available from DMC (Moderna or Pfizer), please contact a medical provider. If you would like to receive a COVID-19 vaccination, please contact the clinic at (907) 983-2255.

Updated Janssen vaccine information: CDC information can be viewed online [here](#). The updated FDA fact sheet can be viewed [here](#).
