**FOR IMMEDIATE RELEASE**  
April 27, 2021

### **POSITIVE RESIDENT COVID-19 CASE NO RISK TO COMMUNITY**

***Skagway, Alaska, April 27, 2021*** – A positive COVID-19 case has been identified by the State of Alaska. The positive case claims residency in Skagway; however, the positive case has not been and is not currently in Skagway, and therefore does not pose a risk to the community.

The EOC recommends that the following protocol continues to be followed:

- Practice good hygiene. Wash your hands for at least 20 seconds several times a day, use hand sanitizer between handwashing, and cover any cough or sneeze. Don't touch your face with unwashed hands.
- Practice social distancing. When you have to leave home, keep a minimum of six feet away from others at all times.
- Wear masks in buildings that are open to the public pursuant to [Resolution No. 21-09R](#).
- Get tested if you are sick. If you are experiencing COVID-19 symptoms, isolate yourself from others and call a provider to get tested. If you require medical attention, call your medical provider before going in.

The Municipality's protocol for COVID-19 cases in Skagway can be viewed online at [www.skagway.org/COVID19](http://www.skagway.org/COVID19).
