Lloydminster, Alberta
Construction Methods

As with all aspects of our Relocatable Structures, our construction methods are well above industry standards and manufactured for long term durability.

All of our designs and drawings are stamped by a Certified Engineer, and once built; all structures are reviewed by Provincial Inspectors and are permitted under Part 10 of the building code for the Province of Alberta.

In conjunction with “Part 10” of the building code, Auburn also adheres to:
• National Plumbing Code of Canada 2010
• Alberta Fire Code 2006
• Canadian Electrical Code Part 1, C22.1-12
• WCB Certification – CSA W47.1

We are also members in the following Industry Associations:
• MHSA – Manufacturers Association & C.O.R. Holder
• MARS – Manufacturers Association for Relocatable Structures
• ISNET World, PICS, ComplyWorks, Merx and Canadian HSE Registry

Our high quality construction methods are reflected in all aspects of our product line up.
